

## Grand Western Canal Joint Advisory Committee

Monday, 4 March 2024 at 7.00 pm

**Please Note:** This meeting will take place at Phoenix House and members of the public and press are able to attend. If you are intending to attend in person please contact the committee clerk in advance, in order that numbers of people can be appropriately managed in physical meeting rooms.

**The meeting will be in person only due to an updated Audio Visual System which will not be installed by the time of this meeting.**

### **A G E N D A**

*Members are reminded of the need to make declarations of interest prior to any discussion which may take place*

- 1      **Apologies**  
To receive any apologies for absence.
- 2      **Public Question Time**  
To receive any questions relating to items on the agenda from the public and replies thereto.
- 3      **Minutes of the Previous Meeting** (*Pages 5 - 12*)  
Members to consider whether to approve the minutes as a correct record of the meeting held on 3rd October 2023.
- 4      **Matters Arising**  
To consider any matters arising from the minutes of the last meeting.
- 5      **Aggregate Industries UK Limited Update**  
To receive an update from Aggregate Industries.
- 6      **Canal Progress Report** (*Pages 13 - 26*)  
To receive a report summarising the work that has taken place with regard to the canal since the last meeting.
- 7      **Canal Business Group Representation**  
To discuss and agree the new Canal Business Group representation.

- 8 **Update on Funding Arrangements for the Grand Western Canal**  
To discuss the current funding arrangements for the Grand Western Canal.
- 9 **Planning Enforcement Update**  
To receive an update on Planning Enforcement.
- 10 **Any Other Business**  
To consider any other relevant business.
- 11 **Identification of Items for the Next Meeting**  
To identify any issues for discussion at the next meeting.
- 12 **Date of the Next Meeting**  
To agree the date of the next meeting scheduled as 1<sup>st</sup> October 2024.

**Stephen Walford**  
Chief Executive  
Friday, 23 February 2024

## Meeting Information

If you want to ask a question or speak, email your full name to [Committee@middevon.gov.uk](mailto:Committee@middevon.gov.uk) by no later than 4pm on the day before the meeting. This will ensure that your name is on the list to speak and will help us ensure that you are not missed. Notification in this way will ensure the meeting runs as smoothly as possible.

Residents, electors or business rate payers of the District may make a statement or shall be entitled to ask questions at a meeting which concerns the Council's powers / duties or which otherwise affects the District. If your question does not relate to an agenda item, the question must be submitted to the Democratic Services Manager two working days before the meeting to give time for a response to be prepared.

Please note that a reasonable amount of hardcopies at the meeting will be available, however this is a limited number. If you are attending the meeting and would like a hardcopy of the agenda we encourage that you notify Democratic Services in advance of the meeting to ensure that a hardcopy is available. Otherwise, copies of the agenda can be found on our website.

If you would like a copy of the Agenda in another format (for example in large print) please contact Angie Howell on: [ahowell@middevon.gov.uk](mailto:ahowell@middevon.gov.uk)

Public Wi-Fi is available in all meeting rooms.

## MID DEVON DISTRICT COUNCIL

### MINUTES of a MEETING of the GRAND WESTERN CANAL JOINT ADVISORY COMMITTEE held on 3 October 2023 at 7.00 pm

#### JAC Members Present:

Cllr L Cruwys	Mid Devon District Council (Chairman)
Cllr C R Slade	Devon County Council (Vice Chairman)
Cllr K Browse	Halberton Parish Council (online)
Cllr S Bush	Tiverton Town Council
Cllr A Davis	Devon County Council (online)
Cllr G DuChesne	Mid Devon District Council
Cllr B Fish	Mid Devon District Council
Cllr L Kennedy	Mid Devon District Council
Cllr A Pilgrim	Holcombe Rogus Parish Council
Cllr R Radford	Devon County Council
Cllr J Wright	Cabinet Member for the Environment
Mr P Brind	Tiverton Canal Company
Mrs P Brind	Mid Devon Moorings
Mr P Burgess	Devon Wildlife Trust (online)
Mr R Hodgson	Friends of the Grand Western Canal
Mr R Jones	Devon Bird Watching and Preservation Society
Mrs J Pilgrim	Inland Waterways Association
Mr M Trump	Tiverton and District Angling Club
Mr T White	Friends of the Grand Western Canal

#### Officers:

Mr M Baker	Country Park Manager, DCC
Mr S Densham	Land Management Officer, MDDC (online)
Mrs A Howell	Democratic Services Officer, MDDC
Mrs S Lees	Democratic Services Officer, MDDC

#### 1 Election of Chairman for 2023/2024

**RESOLVED** that Cllr L Cruwys be elected Chairman of the Committee for the municipal year 2023/2024.

(Proposed by Cllr A Pilgrim and seconded by Mr P Brind)

#### 2 Election of Vice Chairman for 2023/2024

**RESOLVED** that Cllr Colin Slade be elected Vice Chairman of the Committee for the municipal year 2023/2024.

(Proposed by Mr P Brind and seconded by Mrs J Pilgrim)

### 3 **Apologies**

Apologies were received from:

- Cllr Jane Lock
- Peter Saupe
- Richard Walton
- Cllr Lewis Worrow

### 4 **Public Question Time**

Mr Paul Elstone, a Tiverton resident and canal user asked the following questions:-

My question relates to Agenda Item 13 – Impact on Planning Enforcement Activity.

#### **Question 1**

To set some context.

It is becoming evident to anyone who uses the Grand Western Canal for any form of recreation that increasing industrialisation as opposed to farming activities is occurring in close proximity to the Country Park

Industrialisation that is having not only noise, noxious odour dust impacts plus road infrastructure and safety risk but which has the potential for wider and severe water coarse pollution including the Rivers Exe, Lowman and Culm or the canal itself. This as a result of highly toxic products being produced.

In addition, a shooting range currently going thru MDDC planning process at Holcombe Rogus and in close proximity to the canal a range that data shows over 113,000 rounds of ammunition fired in 2021 and against 400 rounds in 2012. A number likely to very substantially increase.

Much of the impacts of these planning decisions to the local community and recreation users can be reduced by the application then compliance of planning conditions.

Concerningly, planning conditions are not being complied with and with no evidence of enforcement. Especially it seems when large financial interest is involved.

As an example, planning condition breaches alleged to be applicable to one site alone.

Over 200 heavy tractor movements are recorded as transiting the Blundells School Campus in a day. Today being a case in point This despite planning conditions that TOTALLY PROHIBIT this traffic.

Why is this happening?

It is alleged that:

The industrial unit is producing electricity for export at over twice consent with massive financial upsides.

Using unapproved land areas for feed stock

Using unapproved land areas for digestate spreading.

Grossly exceeding tonnages for feedstock and digestate resulting in around over 6 times as many stated tractor movements.

Not reporting production plant input data.

Not reporting barrier access or weighbridge data.

Silage not being used as prescribed.

All major breaches of planning consent.

All information known or available to the Planning Authority for several years yet no evidence of any enforcement.

My question and a question particularly directed to the various Councillors on this committee.

What can and will you do to put this situation to rights and as a priority?

The Chair advised that these issues would be addressed during discussion of Agenda Item 13 and that more specific questions would need to be addressed through Planning Officers and the Planning Committee.

## **5 Minutes of the previous meeting**

The minutes from the meeting held on 7 March 2023, having been previously circulated, were approved as a correct record.

## **6 Matters Arising**

There were no matters arising.

## **7 Chairman's Announcements**

The Chair had no announcements to make.

## **8 Canal Business Group Representation**

Mark Baker, DCC Country Park Manager informed the Committee that Graham Moore, owner of The Globe Inn, had sadly passed away and that there was currently no representation from the Canal Business Group.

He advised the Committee that they may wish to consider setting conditions in the form of letter or minutes from a meeting to ensure it is represented correctly and that a place was earned on this Committee.

The Committee agreed that it was helpful to have business representation but that that business needed to represent all businesses and not just their own.

It was therefore **AGREED** to continue with a representation from the Canal Business Group and that the Country Park Manager would look into this further to assess if there was any interest from the businesses along the canal. He would then inform the Committee of who had been contacted and the responses received.

## 9 **Terms of Reference and membership review**

Members considered the Terms of Understanding \* and membership of the Committee.

**RESOLVED** that the Terms of Understanding and membership of the Committee be agreed.

(Proposed by the Chairman and seconded by Cllr A Pilgrim)

Note: \* Terms of Understanding and membership previously circulated; copy attached to the signed minutes.

## 10 **Progress Report**

The Committee had before it, and **NOTED**, a Progress Report from the Country Park Manager summarising the work that had taken place on the canal since the last meeting. A brief discussion took place regarding the following issues:

### **Towpath Resurfacing**

Cllr C Slade thanked the team for their work and the considerable improvements carried out.

### **Flooding at Lowdwells**

The culvert was currently in the process of being cleaned and repaired which would reduce blockages and prevent further damage.

### **Invasive Plant Species**

The invasive Water Fern which was forming in various parts of the canal but which would be dying off in the autumn.

Note: \* Report previously circulated

## 11 **Draft Memorial Bench Policy**

The Committee had before it the draft Memorial Bench Policy \*. It had been asked to consider the draft policy with a view to endorsing it subject to any agreed amendments.

The Country Park Manager explained that there was a trend for memorial benches to be decorated with flowers, plants and other adornments.

There was a need for a consistent approach to the provision of memorial requests and the policy would provide controls on the locations, designs and decorations that were acceptable.

It was appreciated that this would be a sensitive issue and to therefore have a provision within the policy to allow flowers to be left to mark two significant dates each year.

Consideration was given to:

- The sensitivity of the issue but that the memorial benches were not a graveyard.
- The wrappings that were left behind after the flowers decomposed and also that the wrappings would often frighten the horses.
- The frequency of occasions that should be permitted to allow donors to leave flowers.

It was therefore **AGREED** to support the recommendation for the policy to be adopted and to include two significant dates per year for the anniversary of the death and birthdays for flowers to be left a week either side of those dates. They must not be wrapped in plastic and must be collected within one week.

Note: \* Report previously circulated

## 12 **Update on the situation regarding Aggregate Industries**

The following update was provided regarding the situation with Aggregate Industries:

Cllr C Slade informed the Committee that he had written to the Head of Planning but had not yet received a response. He had also been chasing Aggregate Industries but to no avail.

Consideration was given to:

- The importance of this being resolved and that Devon County Council were legally obliged to resolve this for the benefit of the canal.

It was therefore **AGREED** that the Chairman would write to Devon County Council's Chief executive and Leader to ascertain progress and that Cllr A Pilgrim would attend an upcoming Quarry Liaison meeting to seek reassurance that Aggregate Industries would be pursuing this also.

### 13 **Impact of Planning Enforcement activity**

The JAC had been asked to consider asking Mid Devon District Council's Chief Executive to explain the impact and implications of the shortfall in Enforcement Activity when Planning Conditions were breached.

- Cllr A Pilgrim asked for clarity on who was responsible for dealing with this as Mid Devon District Council had advised that they cannot do anything about this.
- Cllr L Cruwys informed the Committee that the Planning Department were desperately short of Enforcement Officers.
- Cllr G Duchesne informed the Committee that there was currently only one enforcement officer and that work was being prioritised. The recent recruitment drive had no applicants apply.
- Cllr A Glover had received an email from Aggregate Industries (AI) today. She suggested putting any concerns in an email to her directly as she would be arranging a site visit.
- Mark Baker advised the Committee that as it was Section 106 then the enforcement was different from Planning and that Devon County Council would have to take AI to court.
- A comment was made about changes to the 5-year rule with regard to the requirement for planning permission.

It was **AGREED** that the Clerk would try to ascertain when the previous Section 106 agreement had expired and when the current one was agreed.

### 14 **50th anniversary of the horse drawn barge**

Mr P Brind, the owner of the Tiverton Canal Company, explained that it was a momentous occasion to be celebrating 50 years. There were currently only two horse drawn barges in England and Wales.

The goal was to celebrate and bring attention to the beautiful canal and Tiverton town. He informed the Committee that there would be a dignitary trip for all Councillors in the season – possibly the end of May and also wished to ask the Committee to share any ideas for celebrating with the official anniversary date being 16 July 2024.

Cllr C Slade suggested organising something for the day of the anniversary and to hold good advertising campaigns on social media and to maybe produce a booklet of activities. He also suggested speaking to the Museum to have an exhibition and advised making contact with the Curator.

Cllr G Duchesne suggested setting up a Sub Committee to put forward ideas and work alongside businesses to really promote Tiverton and attractions such as this.

Cllr S Bush suggested speaking to the Town Centre Manager to help promote any events and encourage Devon County Council to get involved in order to gain media attention.

**15 Any other business**

Mr P Brind informed the Committee that he would be selling the Ducks Ditty café/bar due to wanting to dedicate more time to the horse drawn barge and would like to sell it to someone that could run it as a proper bar.

**16 Identification of items for the next meeting**

It was requested that the following be on the agenda for the following meeting:

- Aggregate Industries (this would be a standing item on the Agenda until the issues were resolved).
- Planning Enforcement and to report back on any updates following a letter from the Chairman to Corporate Manager for Revenue, Benefits, Corporate Recovery, Planning (DM), Corporate Fraud, Welfare and Leisure, and possibly the Development Management Manager and the Director of Place.

**17 Date of the next meeting**

The date of the next meeting was **AGREED** as Tuesday 5 March 2024 at 7pm.

(The meeting ended at 20:20)

**CHAIRMAN**

This page is intentionally left blank

## Progress Report (October 2023 to February 2024 inclusive)

### 1. Lowdwells culvert

Following the significant flooding of properties at either end of the culvert last summer (as reported at the 2023 JAC site visit and October meeting), work to clear and repair this 130m culvert is approaching completion. A large volume of material had been washed into the culvert during storms in recent years, and over many decades the culvert capacity had also become constricted due to the accretion of material along the sides of the culvert. Contractors have been working to remove this material and restore the culvert to its original capacity. The majority of this work has now been completed, with some 40 tonnes of rock and solidified silt being removed, one plastic garden tubful at a time.

The photo right shows the ‘tide lines’ on the walls and the red line indicates the approximate fill level prior to the works.

The focus is now moving to improvements that can be made to the ditches and highway culverts at the outlet end to reduce flood risk in that area. Designs have been drawn up by DCC Bridges and Structures engineers, who are awaiting confirmation of DCC capital funding before proceeding with organising this work.

### 2. Silt pollution in Sampford Peverell

Throughout the winter a two-mile section of the Canal centred on Sampford Peverell has been heavily coloured by silt runoff from the new Edenstone housing development at Battens Cross, and from erosion in the offside field opposite Minnows Touring Park.

The Country Park Manager has corresponded with several concerned Sampford Peverell residents and with a number of organisations including the Environment Agency (EA), Sampford Peverell Parish Council and the DCC flood risk management team. JAC members Adam Pilgrim and Malcolm Trump were also briefed on the matter ahead of their meeting with MDDC planners, as it appears that planning conditions relating to site drainage may not have been observed.

The Edendale site manager has received site visits and follow-up correspondence from the DCC Flood Risk management team and an EA officer, the latter of whom has also spoken to Edendale's national environment lead. This has secured some hasty improvements in drainage arrangements on the site, but despite this the problem of siltation of the canal persists. Although some of the silt from the site has arrived in the canal via erosion into road drainage on Turnpike, the main issue is that the site drainage has been plumbed into an existing drain that runs to the canal from the adjacent 1990s Paullet development.

Given that the majority of the site has been bare soil all winter with lots of vehicles and foot traffic, creating and spreading mud, every time there is significant rainfall the drainage from the site reaches the Canal before silt is able to drop out of the water in the settlement pond.

On the other side of Sampford Peverell, the field opposite Minnows Touring Park which slopes down to the canal has suffered from gullying and erosion with rills forming at the top of the field channelling overland flows during heavy rain and depositing extremely silty water in the canal at the bottom of the slope.

The Country Park Manager spoke to the farmer about this issue, but he claimed that there was nothing he could do as it had been so wet. The matter has now been referred to a member of a new EA

agriculture team dealing with these sorts of issues and the Country Park Manager is awaiting feedback.

Although the volume of silt that is entering the canal is a problem and will bring forward the time at which the Canal will need to be dredged, the bigger issue in both cases is the input of nutrients bound to the silt that will fuel rapid plant growth over the coming years.

### **3. Mid Devon District Council funding cut**

On 3 November 2023, MDDC announced a review of its Strategic Grants, inviting DCC to supply a written submission and an array of supporting documentation by 24 November, and then to give a presentation at the Community PDG meeting on 28 November. The Country Park Manager responded and gave a presentation at the meeting.

The Community Policy Development Group made a recommendation to cut MDDC's contribution to the Canal revenue budget by 15%. This news was shared with JAC members, many of whom wrote to MDDC opposing the proposed cut. Despite this, the MDDC Cabinet decided to ratify the recommended cut to the Canal budget at its meeting on 9 January. This means that MDDC's contribution will stand at £38,250 for 2024/25 and again for 2025/26 (a reduction of £6750 from 2023/24), with presumably another review in 2026. DCC's 'contribution' to the Canal revenue budget in 2024/25 stands at £76k.

It will be very difficult to sustain this level of funding cut without an impact on standards of maintenance – particularly for unplanned costs /works such as breakages, vandalism and tree failures. The Country Park Manager will continue to apply to external funding bodies for grants for any works that can be presented as discrete improvement projects, such as those discussed in following items within this report, but core funding for routine maintenance is extremely difficult to secure externally.

The Country Park Manager has met with MDDC Cabinet Member for Planning and Economic Regeneration Cllr Steve Keable, to discuss the strategic management and funding of the canal. He has offered his ongoing assistance and advice with helping to secure alternative funding. Cllr Kennedy has been investigating whether the Tiverton Town Council contribution (currently £4k pa) could be increased, and Cllr DuChesne has also sought to secure some funding from Halberton Parish Council.

### **4. IWA funding for visitor centre display improvements**

When the Visitor Centre was built in 2012 there was a desire for it to contain lots of hands-on displays to engage visitors. These included two 'retroscopes' - hand-wound 'film clips' contained on a circular carousel of cards. These proved very popular, but perhaps too popular. They have spent a lot of time out of action being repaired due to overuse or misuse, and despite several design changes it's not been possible to find a design that lasts for more than a year.

Plans have been made to refurbish the units to

contain video display screens operated by push buttons which will play a number of different film clips. The change will also require new electrical wiring to provide power to each location. This change in the displays has been made possible thanks to £3550 funding from the Westcountry Branch of the Inland Waterways Association, and the aim is to complete the work ahead of the Easter holidays.

## 5. Countryside Stewardship Capital Grants

In December 2023, Devon County Council entered into a Countryside Stewardship Capital Grants Agreement with Defra, which will provide government funding for undertaking a range of works in the Country Park up until November 2026. A total of £9206 is available for undertaking agreed works including hedge-laying, coppicing bankside trees, pond restoration and putting up bird and bat boxes.

## 6. Funding application to the MDDC Shared Prosperity Fund

Following the submission of an Expression of Interest form last year and the Country Park Manager's attendance at an MDDC funding workshop, a £10k funding application has been made to MDDC to fund the five remaining new noticeboards required to replace all the existing noticeboards along the towpath (following the replacement of seven noticeboards already) and provide two at new locations (Ebear Straight and Beech car park).

This would complete a larger project which also includes the replacement of the A2 interpretation panels within the noticeboards (already funded by the IWA). These panels are currently at the second draft stage with the designers and should be installed by Easter. A decision on the MDDC funding is expected in the coming weeks, and if successful, the five new noticeboards would be delivered and installed in the early summer.

An expression of interest in applying in the next round of the Shared Prosperity Fund for electrical grounds maintenance equipment (to reduce carbon emissions and noise and encourage more volunteer assistance) is being considered.

## 7. Tiverton Canal Co Tourism Award

Devon County Council and the Canal Ranger Service were delighted to learn that the Tiverton Canal Co had won a bronze award in the Small Visitor Attraction of the Year at the 2023/24 Devon Tourism Awards in November 2023. In a highly competitive category, this was a superb achievement for this small family business.

In the press release which DCC issued to mark the award, Philip Brind, of the Tiverton Canal Co, said: "A big thank you must go to everyone that has worked with us, both past and present, to make this award possible. This award for our tourist attraction, would also not have been

possible if it wasn't for Canal Manager Mark Baker, as well as rangers Craig Saunderson, Jo Roberts and the volunteers that help make up the Ranger Service at the canal. We very much see this award as a win for them too, as they work so hard to keep the canal working, which is so vital for us to be able to run the horse-drawn barge successfully.

"We also see this award as a win for Tiverton, and we would like to thank everyone that's visited the canal over the years and for those that continue to support us and the horses. As this attraction is so very rare in Great Britain, it is our goal to keep the horse-drawn barge going for future generations and the recognition of this impressive tourism award will certainly help us to do just that!"

The award was collected at the awards ceremony by Phil's son Tim and the head horseman Lauren Brinsden-Miles.

### 8. 50<sup>th</sup> Anniversary of the horse-drawn barge operating on the Canal

Planning is well underway for celebrations of this year's 50th anniversary of the horse-drawn barge *Tivertonian* operating on the Grand Western Canal. The Country Park Manager has been working closely with the Tiverton Canal Co, Cllr DuChesne, and officers at the District Council and Tiverton Town Council to plan events and activities to celebrate this landmark.

Celebrations and promotions will include:

- Dignitary trip on the horse-drawn barge on 3 April, following the launch of 'The Flock that Rock' model swan trail in the Canal Basin (all JAC members will be invited)
- Display in the flower bed beside the former Vale Vets roundabout
- Banners in the Canal Basin and Town Centre
- Photo competition
- Release of a new video about the horse-drawn barge
- A big Open Day event in the Canal Basin on Sat 13 July, with displays, music, entertainments etc...

To support the delivery of these activities, an application was made by the Country Park Manager to MDDC's Love Your Town Centre Scheme and funding has been approved for promotional banners and signs in the town centre with the aim of improving links between

the Canal and the town centre. The funding will also help to offset some of the costs of putting on the event.

### **9. Sale of the Ducks Ditty floating café-bar**

The Tiverton Canal Co have decided to sell the Ducks Ditty floating café-bar as a going concern. A purchaser has been found and the sale is proceeding. Philip Brind has agreed to provide some background and an update for JAC members at the meeting.

The County Park Manager has been working with DCC legal and estates colleagues to draw up a new lease for the new owner which ensures no major change in presentation or operation, although the hope is that it be open significantly more often than was previously possible.

### **10. Fenacre Water Transfer System**

Following the October 2023 JAC meeting, the Country Park Manager corresponded with the DCC Chief Planner regarding the lack of action by Aggregate Industries (AI) in progressing this matter. He agreed to follow up and after speaking to local / regional AI officers he recommended that the JAC write a strongly worded letter to AI on the matter in order to give the local / regional AI officers additional supportive material to use when bidding for corporate capital funding to progress the scheme.

This letter and the reply that was received will be shared with members ahead of the meeting along with a recap of this long-standing issue. Two regional AI officers have agreed to attend the meeting to explain AI's position and intentions.

### **11. Holbrook Bridge landing stage**

Part of this landing stage was closed off due to a failed beam. The Canal Ranger Service replaced the rotten beam to enable the landing stage to be reopened and further works are planned to remove a trip hazard where the landing stage joins the towpath.

### **12. Wheeled digger jobs at Ayshford**

Towards the end of November, a wheeled digger contractor was engaged to find and seal a leak from the canal through the embankment on the towpath side near Ayshford Bridge. There are some issues with longstanding groundwater springs flowing onto the road below in this area, which have been shown not to be coming from the canal, but when a new seepage of water emerged on the road, the Country Park Manager divined the route and determined that this one was from the canal.

The digger had to dig to a depth of 2m before the leak was intercepted and was then sealed with puddling clay.

Whilst there at that location the opportunity was taken to widen the approaches to Ayshford Bridge, which were narrow and uneven. This was done by scraping out the path and then resurfacing with a few tonnes of limestone scalplings.

### 13. Hedge and bank trimming

A contractor has completed the annual bank and hedge trimming along the towpath and roadsides. This year they managed to secure the use of a slightly smaller tractor than in previous years, which made it easier for towpath users to pass.

Sections of hedge on Swing embankment and near Tidcombe Bridge have been left untopped as they are being allowed to grow on for a year or two before being laid next winter or the winter after.

### 14. Remote controlled embankment flailing

Woody / scrubby vegetation on the Canal's two highest embankments near Swing Bridge and Sellake Bridge is cut periodically to enable inspection and grazing. The safest way to do this is by engaging a remote-control flail contractor, who undertook the work over 2 days in January. The embankments, with the exception of Sellake embankment on the towpath side, are then grazed by adjacent farmers to help keep the vegetation down.

## 15. Barge-based tree works

The Canal Rangers and volunteers have spent most of the winter working from the maintenance barge, clearing fallen trees / branches, trimming overhanging trees, coppicing willows, cutting vegetation back at bridge abutments and putting up bird and bat boxes. Some of this work forms part of the Countryside Stewardship Capital Works agreement outlined in item 5.

Barge-based work had to be suspended for a week when the Canal froze in January, but as of late February, they have worked from the Canal Basin up to Waytown Tunnel focussing on the most urgent works and are now about to start heading back towards Tiverton picking up what other jobs they can before bird nesting starts in earnest.

One other task they completed whilst in Sampford Peverell was the installation of a new nameplate for Buckland Bridge.

## 16. Hedge reduction and coppicing in Tiverton

Several sections of hedge between William Authers Footbridge and Tidcombe Bridge had become overgrown in recent years. Due to the height of the footbridge, full size tractors cannot access this section, and the Canal Ranger Service's small Kubota tractor which does fit under the bridge could not reach the top of the overgrown hedge. The Canal Ranger Team (assisted by tree surgeons with a chipper on one day) spent two days

reducing the height of the overgrown hedges using polesaws, to bring them into line with adjacent hedges that are being maintained by adjacent residents.

### 17. Ash Dieback-related tree works

Every year a tree safety inspection is undertaken along the canal by arboricultural consultants. They make recommendations for immediate safety works and also advisable management works at different levels of priority. Tree surgeons listed on Devon County Council's Tree Framework contract are then engaged to undertake the safety and high priority management work. In recent years, most of this has been related to Ash dieback disease.

Although some work was undertaken in the autumn, the tree surgeons made a start on the bulk of this season's tasks in January, with work due to continue in February and probably early March. In many cases, rather than felling the whole tree, they will be removing the limbs which pose the greatest threat to people below, but retaining much of the trunk which will preserve the benefits to wildlife of standing deadwood. Some of these pruned and pollarded trees may even survive the disease and continue to grow.

### 18. Memorial tree at Fossend Wharf

JAC members may have seen groups of *Wilderness* trailboats on the canal, either during the two National Trailboat Festivals hosted in 2008 and 2014, or during smaller rallies held on the canal, such as the one in 2004 shown in the photo below. JAC members Adam and Jane Pilgrim were involved in organising all of these boating events. On a number of occasions, boaters spent the night moored at Fossend Wharf in Burlescombe. Sadly, one of these boaters died last year and a number of her friends contributed towards the cost of a memorial tree - a Rowan - which was planted at the wharf in January.

### 19. Conservation Area Appraisal

In February, the Country Park Manager was contacted by the MDDC Conservation Officer to discuss an appraisal he will be conducting for the Grand Western Canal Conservation Area. They have agreed to meet, along with the DCC County Archaeologist and a Historic

Environment colleague working on the Tiverton Eastern Urban Extension, to discuss any threats to the Conservation Area and any improvements that could be made with regard to the Canal's heritage.

## 20. Hedgelaying

Three volunteer days have been held on Sundays during the winter and on each occasion the task has been hedgelaying. Two days were held at East Manley, laying the hedge beside the boat moorings, and one was held near Manley Bridge, laying the hedge around the car park as shown in the photos below.

## 21. Landslip at Greenway cutting

Following heavy rain, a small landslip took place in Greenway cutting with around two tonnes of soil sliding onto the towpath. This was made passable by Canal Rangers the following day and then cleared away by contractors two days later. These small landslips appear to be occurring every year or two and may be the result of wetter winters.

## 22. Greenway edging beam

A small but surprisingly expensive job was completed by contractors at Greenway Bridge. Here the edging beam beside the bridge had rotted to the point that nails and bolts within the beam had become exposed. This is a popular launching and retrieving point for canoeist and kayakers, including the scouts that use the hut above, and so the beam needed to be replaced to ensure their safety. The new oak beam is bolted to the underlying concrete abutment which was installed when this section of canal was relined in 1990/91.

## 23. New Noticeboards

As part of the project described in Item 6, three new noticeboards funded by the IWA were delivered last year. All three have been assembled and one has been installed at Manley Bridge (where the previous noticeboard had become unsafe). The other two will probably be installed in March or April, once the priority to complete tree work ahead of bird nesting has passed.

## 24. Wall repairs

Building contractors have repaired a section of the coping on the wall beside the Canal Visitor Centre (shown in the photo below, taken prior to the repairs). A few metres of coping had come free from the wall, and was breaking up, meaning some of the bolts to which the railings are fixed were wobbly and insecure. There was no immediate danger of the railings failing as they were still fixed together and to points on the wall, but it was good to ensure that the wall and railing are completely secure.

## 25. Volunteers

Sadly, our long-term volunteer Craig has been unable to spend much time working at the Canal in recent months due to ill health, but we are fortunate to have a very keen and able new midweek volunteer named Chris who started in January. We continue to have two work experience students from Bicton College working one day per week.

On 9<sup>th</sup> October, we were very grateful to have 10 students from Blundells School working in the Canal Basin painting the railings as part of the school's Community Engagement Day.

Weekday volunteering = 84 days

- 8th Oct - Volunteer Day – Ranger Office garden - 7 volunteers
- 12th Nov - Volunteer Day - East Manley - 3 volunteers
- 14th Jan - Volunteer Day - Manley - 6 volunteers
- 11th Feb - Volunteer Day - East Manley - 6 volunteers

Weekend Volunteer Days = 22 days

Total volunteering days completed = 106 days
