

At last week Environment PDG Cllr Les Cruwys asked a question around the possibilities of having the display unit for modular housing currently planned to be displayed in Cullompton also displayed in Tiverton , in my response I indicated that the costs to move the unit would most likely be prohibited but I would supply a written response.

Having checked with both Mr Mike Lowman, Operations manager for building services and Mr Simon Newcombe corporate manager for Public Health , Regulation and Housing, I am able to supply the following written response.

The supply of the Pod is part of the agreed contract but only to a single location, the approximate cost of relocation would be around £9k.

This is why it was decided on the one location because the cost is so high and hard to justify this additional expense to the HRA account.

Can I ask that all members of the committee are supplied with a copy of my response this is also duplicated in the printed minutes.

Thank you

Bob Evans

Lower Culm

Deputy Leader of the Council

Cabinet Member for Housing & Property Services
