ROW	Service	Development Group	Budget Holder		(including risks of delivery)	(£k)	(£k)	(£k)	(£k)	(£k)	(£k)	(£k)	(£k)	(£k)
17	Development Management	Planning, Environment & Sustainability	John Hammond		Planning Performance Agreements - increase income from £20,000 - £40,000 for 2025/26. Note the use of PPA's should refect the service looking to acquire additional capacity resource to deal with increased demands. As such, an increase in PPA income should also reflect an increase in consultants comissioned to act on new applications. Note use of PPA likely to increase because of (i) HLS and (ii) Familiarity with process	(£2	0)		(£10)		(£10)		
18	Development Management	Planning, Environment & Sustainability	John Hammond		Fees & Charges - Increase in national fees for particular application types. The target of £835,000 for 2024/25 was not achieved by reason of national trends resulting in the submission of fewer applications. MHCLG introduced new fees for a number of application types which result in high volume submissions, which, based upon the 2024/25 submissions would increase actual (rather than target) income by @ £100,000		(£50)						
19		Planning, Environment & Sustainability	John Hammond		7201 - Fees & Charges Likely increase if applications for housing. The target of £835,000 for 2024/25 was not achieved by reason of national trends resulting in the submission of fewer applications. As MDDC no longer has a sufficient housing supply it is likely that we will receive speculative applications for housing development until a new Local Plan is put in place. Combined with line 8 above fees should increase compared to recent levels.		(£50)						
23	Forward Planning	Planning, Environment & Sustainability	Tristan Peat		Grants £10k SLA with the Devon Community Housing Hub to undertake parish based housing needs surveys for planning purposes and to support Community Land Trusts wishing to bring forward local housing schemes. The Council is presently unable to undertake local housing needs surveys in house and is not aware of a suitable alternative provider. There may be potential to use funds from S106 agreements for the provision of affordable housing instead to pay for part / all of the SLA with the Devon Community Housing Hub subject to this being CIL regulation 122 compliant.			(£10
