Review Note: The council employs four Chartered Ins of Personnel and Development (CIPD) staff who undertake regular employment law updates. All policies are reviewed on an three year programme which has slipped lately due to pressure of work (reorganisations, consultations and redundancies) however we always prioritise legislative change. Therefore whilst this is a huge risk it is a risk which is managed.

Risk: Chemicals Staff using chemicals incorrectly.

Head of Service: Christina Cross

Review Note:

Risk: Eastern Urban Extension Tiverton If progress on a masterplan is delayed, the Council becomes vulnerable to speculative planning applications being submitted which do not accord with adopted policies. This could lead to unsustainable development which would not meet policy requirements for essential infrastructure.

Effects (Impact/Severity): Delay will reduce confidence in the deliverability of the urban extension in a comprehensive and coordinated manner, thereby increasing the likelihood of planning applications being submitted for disparate areas of land without the necessary infrastructure provision or without a means of ensuring that infrastructure can be provided at the right time and in the right place. Additionally, individual applications increase the risk of proposals prejudicing the delivery of other areas of land within the allocation.

Causes (Likelihood):

Risk: Fire and Explosion Risks associated with storage of combustible materials, fuels and flammable substances and sources of ignition, as well as emergency procedures (existence, display and knowledge of), accessibility (or obstruction) of emergency exits and walkways to. Also, risks associated with use of fire extinguishers, having correct type in location, in date and trained operatives on site.

Effects (Impact/Severity): Very High (5) – Although the risk is low, a fire in the server or storage room could potentially cause loss of life, have serious financial implications and severely impact the councils ability to provide services due to loss of IT infrastructure.

Causes (Likelihood): Very Low (1) – The likelihood of a fire within ICT is extremely low. No quantities of combustible materials are stored within the work area. There is easy access to the emergency exit and all staff have received fire awareness training.
